

**TOWN OF DEERING**  
762 Deering Center Road  
Deering, NH 03244

**Fire Department Study Committee  
(FDSC)  
Meeting June 16th, 2022  
\*Meeting held at Donovan Station\*  
Minutes  
5:30pm**

**MEETING CALL TO ORDER**

**New Business:**

- Discussion with Residents about EMS and Fire Staffing
  - A few members of the public that were present asked questions to the committee about the current staffing levels. Captain Parese, Pat Murdough and Julius Peel answered the questions as posed. The main concern discussed was response times during Per- Diem hours and during On-Call hours. The committee clarified that there are no full-time fire fighters working for the station.
- Report about Building Needs
  - Captain Parese reported to the committee his research regarding what a fully staffed Fire Station would look like. He broke this down into combining two stations with ambulance services and without ambulance services. He then explained if the stations were retrofitted as they are currently. Captain Parese noted that this was a draft listed and would be reviewed later as the committee determines what path it would like to take. Reference the attached document for more information.
- Tour Building (s)
  - Captain Parese gave the committee members a tour around Donovan station, explaining the issues located around the building. He referenced rot within the windowsills, cracks in the foundation and open wall insulation.
- Prepare for Next Scheduled Meeting

**Old Business:**

**Adjourn:**

The committee adjourned at 6:30PM

*\*This agenda is subject to change right up to the scheduled meeting.*

**Combining 2 stations with ambulance services**

**Donovan/Murdough**

Approx. lot size of 2-3 acers
