ARTICLE 2. Are you in favor of the adoption of the amendment to the zoning ordinance for Watershed Overlay Review Criteria Section 4.5.6 as proposed by the Planning Board for the Town of Deering zoning ordinance as follows?

To protect Deering Lake, the existing provision requires that septic systems within the Watershed Overlay be inspected and pumped on a regular three year interval to assure that no system fails and pollutes Deering Lake. This provision applies ONLY to septic systems within the Watershed Overlay. While the existing provision allows the certified septic services to specify a different interval when the system is inspected and pumped, the amendment would allow an independent State certified septic system evaluator to also specify a different interval to avoid any potential conflict of interest. Additional language would also require that when an existing system is replaced or repaired or a new system is installed where one did not previously exist within the Watershed Overlay, the designer or installer shall specify the regular servicing interval that shall apply. The existing provision refers to the Town of Deering Planning and Zoning Administrator, a position that no longer exists so it has been replaced with a generic reference to the Town of Deering. The existing provision has no penalty specified for imposition when the pumping requirement is ignored. A penalty and enforcement process is now included, along with a waiver process. Implementation will be effective July 30, 2015.

Watershed Overlay
Review Criteria 4.5.6**

Revise 4.5.6 by striking the existing paragraph d) and replacing it with the following (The underlined text has been added; the text in brackets is being deleted):

d) All septic tanks will be pumped and inspected by a State of New Hampshire licensed septic services provider to ensure proper functioning and a copy of the pumping and inspection report shall be sent to the Town of Deering [Planning and Zoning Administrator]: Attention Administrative Assistant within 30 days of its occurrence. Such pumping and inspection shall occur at least every three years or at the interval recommended by the licensed septic service provider in writing at the time of last service or the interval recommended in writing by a State certified septic system evaluator following an examination of the system and a review of the most recent prior inspection report. When an existing septic system within the Watershed Overlay is replaced or repaired, or a new septic system is installed where one did not previously exist to service a dwelling within the Watershed Overlay, the licensed septic system designer shall specify the interval recommended for pumping and inspection of that system under this provision. If two or more dwelling units share a common sewage treatment system, a perpetual maintenance agreement binding the dwelling owner is required. If a septic system remains in non-compliance with the interval required under this provision for 30 days after the owner of record has been notified by certified mail by the Town of Deering: 1) a penalty of \$250 shall be imposed, 2) the matter shall be considered a potential threat to health, and 3) the matter shall be referred to the Town of Deering Health Officer for enforcement. The initial \$250 penalty shall double every six (6) months that the septic system remains in non-compliance, to a maximum allowed by the State of New Hampshire RSA's then in effect. The Planning Board may waive this section upon appeal for justifiable cause. The amendments to this section shall take effect on July 30, 2015.
