March 2009

Deering Conservation Commission Wood Duck Restoration Program Report 2008

The year 2008 was an average year for wood duck reproduction in the Town of Deering. The hatched eggs to un-hatched ration was 68%/32%.

The Deering Conservation Commission (DCC) checked 53 boxes, which contained a total of 103 eggs. This year we replaced only one box and have a couple in reserve.

The DCC is aggressively looking for new locations of beaver activity in which to place new boxes. Many of our original locations no longer contain standing timber, which make it hard to establish long term viable nesting boxes. If you know of any new beaver ponds, please contact a member of the DCC to check it out for possible installation of a wood duck nesting box.

The DCC tries to keep at least two nesting boxes in our reserve at all times for replacement purposes. If anyone has any 12 inch x 12 inch rough cut boards, we could certainly use them to build some additional houses for installation next year.

For additional information call Ed Cobbett at 464-4088.
